

Ci-800DP Series

Remote Process Cluster Transmitter

Ci-800DP
Remote Process
Cluster Transmitter

Analog Process Transmitters

Features

- 8 Ch. Software configurable Analog signal transmitter
- Integrated Profibus-DP slave interface (upto 12Mb)
- EMC compliance with IEC 61000-4-4 for EFT bursts & IEC 61000-4-5 standards for Surges
- Compact DIN rail mountable enclosure
- Modular expansion options

Applications

- Remote Process signal transmission
- Migration from conventional Analog transmitters to Fieldbus based system
